1. The first step is to identify the problem. This involves understanding the current situation and what needs to be changed.

1. The first step is to identify the problem or question that needs to be answered. This involves understanding the context and the specific requirements of the task.

2. Next, it is important to gather relevant information and data. This can be done through research, consultation with experts, or by analyzing existing data sets.

3. Once the information is gathered, the next step is to analyze it. This involves identifying patterns, trends, and relationships that can help in understanding the problem.

4. After analysis, the next step is to develop a solution or plan. This involves identifying the most effective approach to solve the problem, taking into account the available resources and constraints.

5. Finally, the solution is implemented and the results are evaluated. This involves monitoring the progress of the implementation and making adjustments as needed to ensure that the problem is solved effectively.

DEVELOPMENT OF A QUALITY CURRICULUM

[illegible]

JOURNAL OF SOLUTION CHEMISTRY

Vol. 12, No. 4	CONTENTS	April 1984
<hr/>		
The Effect of Temperature and Pressure on the Permeation of CO_2 Through Glass at 100.0 bar and 100.0 MPa, and at 1.00 and 10.00 MPa		1007
By M. M. S. A. Al-Khateeb, J. L. Cleverton, D. Wang, L. A. D. Henderson, and T. P. Davis		
<hr/>		
Water Activity and Water-Organic Interactions in Ethylene and Propylene/Hydrocarbons and Hydrocarbons/Water Solutions		1017
By A. Kricheldorf and W. Knappe		
<hr/>		
Thermodynamic of Liquid Mixtures by the Method of Group-Contribution: the $\text{Methanol}-$ Ethylacetate System		1027
By R. B. Smith, M. H. Emdin, and A. F. Evans		
<hr/>		
Stability of Sodium, N-Methylacetamide, and Carbamates in Liquid Mixtures at 25.00°C		1037
By J. K. Stille, J. P. P. van der Pijl, and J. K. Stille		
<hr/>		
The Stability of Mixing Equations: Solutions of CaCl_2 , CaCl_2 , NaCl , and NaCl with H_2O at Varying Salt Strengths at 25°C		1047
By J. K. Stille and J. K. Stille		
<hr/>		
Thermodynamic of Aqueous Salt Solutions: II. Thermodynamic Functions for Aqueous Solutions of Sodium Chloride		1057
By J. K. Stille		

Thermodynamic Properties of

Dehydrochlorination of 2,3-Dichloro-2,3-Dimethylbutane
 Formation

439

H. Okamoto, K. Ito, and M. T. Saito

Estimated Enthalpy of Formation: Investigation of

Carbon-Argon Clusters in Argon
 and Neon Solvent Mixtures

453

M. Nakagaki and H. Imai

The Enthalpies of Formation of

FL, Dimerization Equilibrium of 2,2,6,6-Tetramethylpiperidine-1-oxide
 and 2,2,6,6-Tetramethylpiperidine

465

J. Kozuka, H. I. Okamoto, and T. Saito

Enthalpy of Formation of 2,2,6,6-Tetramethylpiperidine-1-oxide

by the 2,2,6,6-Tetramethylpiperidine-1-oxide/2,2,6,6-Tetramethylpiperidine
 System

477

M. T. Saito

Enthalpies of the Solvation of

Hydrogen Peroxide (H₂O₂) and Carbon Dioxide
 into the H₂O-*n*-Butanol Solvent Mixtures

489

H. C. Ho, S. J. C. Lee, and J. L. Fan

Enthalpy of Formation of

2,2,6,6-Tetramethylpiperidine-1-oxide (TEMPO) and 2,2,6,6-Tetramethylpiperidine
 from the H₂O-*n*-Butanol Solvent Mixtures

493

J. L. Fan, S. J. C. Lee, and J. L. Fan
J. L. Fan, S. J. C. Lee, and J. L. Fan

Enthalpies of Formation of

2,2,6,6-Tetramethylpiperidine-1-oxide (TEMPO) and 2,2,6,6-Tetramethylpiperidine
 from the H₂O-*n*-Butanol Solvent Mixtures

497

H. C. Ho, S. J. C. Lee, and J. L. Fan

Enthalpies of Formation of

2,2,6,6-Tetramethylpiperidine-1-oxide (TEMPO) and 2,2,6,6-Tetramethylpiperidine
 from the H₂O-*n*-Butanol Solvent Mixtures

501

JOURNAL OF SOLUTION CHEMISTRY

Vol. 18, No. 1

CONTENTS

December 1989

1. Measurements of Vapor Solubilities at High Temperatures:
and Pressure Using a New Type of Solubility Cell
C. Baudouin, P. Dumas, M. Magot, and J.-P. Le Goff
101
2. Effect of Composition Dependence of Vapor
Thermodynamic Properties for Hydrocarbons:
Binary and Ternary Systems
H. Arai, M. Tani, H. I. Ishikawa, and H. Arai
115
3. Thermal Characterization of Aqueous Sodium Hydroxide
Solutions at High Temperatures
M. Tani, H. I. Ishikawa, and H. Arai
129
4. Study of the Configuration and Penetration Properties
in the Vapor Phase
M. Tani, H. I. Ishikawa, H. Arai,
and J.-P. Le Goff
143
5. Representation Properties of Aqueous, Aqueous,
and Aqueous Hydrocarbons and
Aqueous Hydrocarbons in Phase Diagrams
and Thermodynamic Properties
M. Tani, H. I. Ishikawa,
and J.-P. Le Goff
157
6. Solubility of Hydrocarbons in the Presence of
Salt and in the Presence of Salt
M. Tani, H. I. Ishikawa, P. Dumas, P. Le Goff,
and J.-P. Le Goff
171
